PORTFOLIO ahmadjon.pages.dev

Flutter engineer with 6+ years of mobile development (Android since 2019, Flutter since 2021) and 30+ apps shipped to Google Play and the App Store. I build whole products: the Flutter app, the Django or Node backend behind it, the AI features inside, and the server it runs on. Mobile lead on Zynygram (8K+ users, 148k lines of Flutter).

EXPERIENCE

ZynySoft — Flutter Developer (mobile lead, Zynygram)

May 2026 – now

- Own the Zynygram Flutter app: 16 feature modules, clean architecture (BLoC, freezed, go_router, get_it).
- Built 1:1 WebRTC calls with CallKit, reels with capped HLS players, on-device video compression, and a per-account beta track on Shorebird code push.
- Shipped v1.0 → v2.0.8 in five months; App Store ★4.9; 8K+ registered, 5K+ monthly active users. Co-founder & lead engineer of Klipmatic (AI video studio).

InSoft Technology — Software Engineer

Aug 2024 – Apr 2026

- Supported and extended the Lider Taxi passenger app (booking, SMS OTP, live vehicle tracking, en/ru/uz); built a mobile learning platform with offline downloads; then a multi-tenant SaaS backend (Django, Celery, Redis).

U-Logistic — Flutter Developer (freelance, lead mobile)

Oct 2024 – Jul 2025

- Driver and operator logistics app: real-time chat (socket.io), voice/video calls (Zego), live tracking on Google Maps, Crashlytics; 1K+ installs.

Freelance Flutter & Backend Developer

Late 2021 – now

- ZAKO: sole Flutter engineer of a real-time 1v1 knowledge-duel app (22 modules, WebSockets, StoreKit 2 IAP, server-verified ads); 500+ users on both stores.
- Fresh Tour, a tour-booking app live on both stores; Flutter desktop POS cashier for Windows & macOS.

BuyUp — Founder & Flutter/Backend Developer

Aug 2023 – Mar 2025

- Game top-up store with \$40K+ in sales in a year: Flutter app and admin, Django checkout API with Redis caching and rate limiting.

Buypin — Junior Flutter Developer · Upwork — Android Developer

2019 – 2022

- Game-payments app with Stripe & Payme (Provider, BLoC, FCM). On Upwork: 8 client Android apps published to Google Play.

SKILLS

Mobile Flutter, Dart, BLoC, freezed, go_router, get_it/injectable, Riverpod, Kotlin, Swift/SwiftUI

Platform WebRTC, CallKit, FCM, Shorebird, StoreKit 2, AdMob, Google Maps, CI with GitHub Actions & Codemagic

Backend Django, DRF, Channels, Celery, PostgreSQL, Redis, FastAPI, Fastify

AI OpenAI, Gemini, Claude, Seedance, Kling, LLM pipelines; 2 years of daily AI-assisted engineering with Claude Code, Codex and Gemini

EDUCATION & AWARDS

- B.Sc. Software Engineering, Fergana State Technical University, 2022–2026 · GPA 4.9/5
- Two-time ICPC Northern Eurasia Finals qualifier (2023, 2025)
- ICPC Uzbekistan Regional 2023 — Third Award
- UzCombinator Founders Camp 2026 · Meta Back-End Developer (Coursera)
- Languages: Uzbek (native), English (B1)
